

# HOTEL STREAMING, SECURE

With the GSS Cast Server, your guests can feel right at home by streaming their own content to the hotel TV.

Cast Server

## GUEST EXPERIENCE

Just like at home, guests can use all their favorite streaming apps in your hotel without having to log in to the TV. The GSS Chromecast solution makes it increasingly easy for your guests to stream their own content, and here's how:

### STREAM CONTENT IN THREE STEPS:

- 1 Connect to the hotel Wi-Fi
- 2 Scan the QR code on the TV
- 3 Stream content from your favorite app

With the user-friendly interface, the guest is taken through the process smoothly, so no questions remain unanswered!

## DATA PROTECTION – OUR TOP PRIORITY

We take the protection of your guests' personal data extremely seriously. GSS' technical solution ensures that the cache is cleared and the history deleted after every check-out, thus making sure no new guest has any access to the data of the previous ones.

## SIMPLE INSTALATION

The Chromecast System is easy to implement and consists of two components: the GSS Cast Server as central gateway and the Chromecast devices. The only prerequisites are a HDMI connection to the TV and a hotel-wide Wi-Fi network.

## EXCELLENT OVERVIEW

Thanks to our management software you will always retain a perfect overview. You gain insight into the bandwidth used, monitor the status of the built-in Chromecast and can use statistics to anonymously evaluate the usage of your guests. The server also ensures the correct assignment of Chromecast devices and secures the protection of guests' personal data.

## THEFT PROTECTION

The clever mount firmly attaches the Chromecast to the TV and prevents theft or unauthorized resets of the Chromecast by your guests.

## ABOUT GSS

Since 1995, GSS has been a manufacturer of innovative TV reception technologies based in Nuremberg, Germany. In addition to headend stations, encoders, decoders and transcoders, with its Smart Solutions products, GSS offers a line of ready-to-use and tailored products which cater to the hotel industry.
